pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Bouneau, L., Billault, A., Quetier, F., Saurin, W., Bernot, A. and Welssenbach, J.  TITLE Charaterization and repeat analysis of the compact genome of the freshwater pufferfish Tetraodon nigroviridis JOURNAL Unpublished REFERRNCE 2 (bases 1 to 806)		Unpublished 3 (bases 1 to 806) Genoscope. Direct Submission	JOURNAL Submitted (12-APR-2000) to the EMBL/GenBank/DDBJ databases COMMENT This sequence is a single read and was generated as part of a large scale clone-end sequencing project of the Tetraodon nigroviridis genome. For more information, please take a look at http://www.genoscope.cns.fr/Tetraodon.	rce	/cloud_lib_s /note="Genoscope sequence ID : COBGO95BD12LP1-end : T7" BASE COUNT 247 a 87 c 99 g 333 t 40 others ORIGIN	Query Match 1.3%; Score 83; DB 221; Length 806; Best Local Similarity 43.5%; Pred. /note="vector: pucl8; Site_1: Smal; Constructed at The Institute for Genomic Research (TiGR), Rockville, MD. Genomic DNA isolated from a cloned population of Trypanosoma brucei (TREU927/4 GUTat 10.1) was mechanically sheared to give a tight size distribution (approx 2 kb). The v + i method used for the library construction is described in detail in Smith, H.O. and Venter, J.C. (Making small insert libraries for whole genome shotgun
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Jequencing projects. Genomic DNA isolated from a cloned population of
Trypanosoma brucel (TRE0927/4 GUTat 10.1) was mechanically
sheared to give a tight size distribution (approx 2 kb).
The v + i method used for the library construction is
described in detail in Smith, H.O. and Venter, J.C.
(Making small insert libraries for whole genome shotgun
sequencing projects. In Genome Sequencing: A Practical
Approach, eds. M. Vaudin and B. Barell, Oxford University
Press, 1999)."

Charaterization and repeat analysis of the compact genome of the freshwater pufferfish Tetraodon nigroviridis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Direct Submission
Submitted (12-APR-2000) to the EMBL/GenBank/DDBJ databases
This sequence is a single read and was generated as part of a large
scale clone-end sequencing project of the Tetraodon nigroviridis
genome. For more information, please take a look at

Johne="Vector: pUC18: Site_1: Smal; Constructed at The Institute for Genomic Research (TIGR), Rockville, MD. Genomic DNA isolated from a cloned population of Genomic DNA isolated from a cloned population of Trypanosoma brucei (TREU927/4 GUTat 10.1) was mechanically sheared to give a tight size distribution (approx 2 kb). The v + i method used for the library construction is described in detail in Smith, H.O. and Venter, J.C. (Making small insert libraries for whole genome shotgun sequencing projects. In Genome Sequencing: A Persex, 1999)."

Press, 1999)."

/lab_host="E. col! %L2 Blue Script II ($K-); Site_l: EcoRV; C.
parvum (lowA isolate) genomic DNA was hydrodynamically
sheared to produce fragments having a tight size
distribution between 2-4 kb by Dr. Yvonne Thorstenson of
the Stanford DNA Sequencing and Technology Center
(http://sequence-www.stanford.edu/group/techdev/shear.htm
). The randomly sheared gDNA was chromatographed on
Sephacryl S-400 to remove any small fragments and DNA
eluting in the void volume was subcloned into an EcoR
V-digested, alkaline phosphatase-treated pBlueScript II
($K-) vector and transformed into E. coli strain XL2 Blue
MRF'. Recombinant clones from the first plating of the
library were selected for sequence analysis using T3 and
T7 primers."

```
New nucleic acid encoding Moraxella catarrhalis outer membrane protein, useful in protective vaccines and for diagnosis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Moraxella catarrhalis strain Q8; major outer membrane protein;
200kDa outer membrane protein; antibacterial; immunogenic; infection;
otitis media; detection.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       M. catarrhalis strain Q8 200kDa protein SEQ ID NO:9.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ÄH.

Claim 1; Fig 4A-V; 247pp; English.

XX

The present invention describes an isolated and purified nucleic acid (1)

CC that encodes a 200 kba outer membrane protein of Moraxella catarrhalis.

CC The 200 kba outer membrane protein (II) has antibacterial activity and CC an be used in vaccines. (II), and its truncated versions, are used as can be used in vaccines (II), and its truncated versions, are used as immunogenic compositions and vaccines to protect against M. catarrhalis infections, particularly outlis media in humans. (II) is also used as antigen in immunoassays for detecting specific antibodies (Ab), and to generate Ab. (I) are used for recombinant production of (II) and its fragments are used as probes for identifying/cloning 200 kba protein consension of truncated versions of (II) reduces toxicity of the protein towards the Escherichia coli host. The present sequence represents the covards the Escherichia coli host. The present sequence represents the covards the Escherichia coli host. The present sequence represents the covards the strain QB 200kba protein, which is given in the coverement invention.

The present invention describes an isolated and purified nucleic acid (I) that encodes a 200 kba outer membrane protein of Moraxella catarrhalis.

The 200 kba outer membrane protein (II) has antibacterial activity and can be used in vaccines. (II), and its truncated versions, are used as immunogenic compositions and vaccines to protect against M. catarrhalis infections, particularly outlis media in humans. (II) is also used as antigen in immunoassays for detecting specific antibodies (Ab), and to generate Ab. (I) are used for recombinant production of (II) and its fragments are used as probes for identifying/cloning 200 kba protein genes from other strains, and for diagnostic detection of M. catarrhalis.

(I) makes possible production of large amount of recombinant immunogens. Expression of truncated versions of (II) reduces toxicity of the protein towards the Escherichia coli host. The present sequence represents the moral strains of the protein which is given in the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               New nucleic acid encoding Moraxella catarrhalis outer membrane protein, useful in protective vaccines and for diagnosis

The present invention describes an isolated and purified nucleic acid (I) that encodes a 200 kba outer membrane protein of Moraxala catarrhalis. The 200 kba outer membrane protein (II) has antibacterial activity and can be used in vaccines. (II), and its truncated versions, are used as immunogenic compositions and vaccines to protect against M. catarrhalis infections, particularly otitis media in humans. (II) is also used as antigen in immunoassays for detecting specific antibodies (Ab), and to generate Ab. (I) are used for recombinant production of (II) and its fragments are used as probes for identifying/cloning 200 kba protein genes from other strains, and for diagnostic detection of M. catarrhalis. (I) makes possible production of large amount of recombinant immunogens. Expression of tuncated versions of (II) reduces toxicity of the protein towards the Escherichia coli host. The present sequence represents the M. catarrhalis strain 4233 lambdababbablas force 200kba protein, which is
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           outer membrane protein,

Natural or recombinant outer membrane protein is useful as an immunogen to protect against infection by Moraxella, esp. M. catarrhalis. It can also be used to detect antibodies, esp. Go differential diagnosis abtween bacteria that cause similar symptoms, and also useful as a carrier for other antigens and used to raise antitumour antibodies for conjugation to therapeutic agents.

28; that encodes a 200 kba outer membrane protein of Moraxella catarrhalis. The 200 kba outer membrane protein (II) has antibacterial activity and can be used in vaccines. (II), and its truncated versions, are used as immunogenic compositions and vaccines to protect against M. catarrhalis infections, particularly otitis media in humans. (II) is also used as antigen in immunoasays for detecting specific antibodies (Ab), and to generate Ab. (I) are used for recombinant production of (II) and its fragments are used as probes for identifying/cloning 200 kba protein genes from other strains, and for diagnostic detection of M. catarrhalis. (I) makes possible production of large amount of recombinant immunogens. Expression of truncated versions of (II) reduces toxicity of the protein towards the Escherichia coll host. The present sequence represents the exemplification of the present invention. 114 165 225 174 285 234 345 287 404 345 456 405 515 422 448 635 Gaps 58 56 VIGATLNGSAYAQQITTK-IEIGQTNKINNTLKGDALATGEASIAFGSLSKAQGSQAIAI GSVKPDPNNGSNGNVGSHAKGNESIAIGGDVLAEGDASIAIGSDDLYL-----PKN 226 ATAEAAYSLAVGLAAQATKQSSIAVGSNAKANAFAATAIGGNTVVNLGRGVALGFGSQIL DAVNVAQLKLVEELA-NRKITFKGDGDNNSNSVERGLGNTLTIKGDAQTNALTEANIGVV --TDGNGLKVKLAKELTGLTSV----SATNKITVSNTNNNAELQSGGLTFS-PITGTK -TDKTVYSIDGLKFTNDSNSIATKGTTRITKKKIGFAGTNDGVDESKPYLDNEKLKVGNS TLNSGSLTVNNTTGNKQIQVGANGIKFATVANNVANTSATVGTARITEEKIGFAGTNDGV 576 DEQAPYLDKERLKVGRVEITTDSGINAGNHKITGLTNGIANTDAVTIKQLKDAKPTLNAG LDLKNEFHKLIHGHEILKKIQTSTDGKIKYRRTRAQGHASTAVGAMSYAQGHFSNAFGTY 286 DRDNNTDASAYVPLGKTLADQYKATRQGDSTDIFSIGNSNNNNSSIRRKIINVGAGSRDT Indels 186; Length 1992 Query Match 71.5%; Score 7405; DB 22; Best Local Similarity 74.2%; Pred. The present invention describes an isolated and purified nucleic acid (I) that encodes a 200 kDa outer membrane protein of Moraxella catarrhalis. The 200 kDa outer membrane protein (II) has antibacterial activity and can be used in vaccines. (II), and its truncated versions, are used as immunogenic compositions and vaccines to protect against M. catarrhalis infections, particularly otitis media in humans. (II) is also used as cantigen in immunoassays for detecting specific antibodies (Ab), and to generate Ab. (I) are used for recombinant production of (II) and its fragments are used as probes for identifying/cloning 200 kDa protein genes from other strains, and for diagnostic detection of M. catarrhalis. (I) makes possible production of large amount of recombinant immunogens. Expression of truncated versions of (II) reduces toxicity of the protein towards the Escherichia coli host. The present sequence represents the catarrhalis lesi 200kDa protein, which is given in the exemplification.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             membrane protein,

Its amino acid sequence was deduced from a genomic DNA clone (AAT41476) derived from Haemophilus influenzae type b strain C65. Large quantities of recombinant HA2 can be produced in transformed prokaryotic or eukaryotic host cells, for use in vaccines against influenzae infection.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            0-618897/59.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  000
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ်

hymunogenic composition comprising an Hia gene, a polypeptide encoded by an Hia gene, or a recombinant Hia polypeptide is useful for inducing protection against disease caused by Haemophilus strains in a susceptible host, preferably a human. An Hia protein is useful as an antigen, in immunogenic preparations including vaccines, as a carrier for other immunogenic preparations including vaccines, as a carrier is useful for treating diseases caused by the infection of Haemophilus influenzae such as meninglis, epiglotitis, septicaemia and oitis media. Recombinant production of Hia favours high recovery of the protein compared to the low recovery of native protein from Haemophilus influenzae species. A truncated protein has a significantly higher amount of recovery than a full-length protein. 2411 AA; Sequence \$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$**%**

```
The present sequence represents a Haemophilus influenzae adhesin (Hia) protein from the non-typeable Haemophilus influenzae (NTH1) strain 29. Hia genes and proteins have antiinflammatory, auditory and antibacterial activities, and proteins have antiinflammatory, auditory and antibacterial activities, and can be used in the production of a vaccine. An immunogenic composition comprising an Hia gene, a polypeptide encoded by an Hia gene, or a recombinant Hia polypeptide is useful for inducing protection against disease caused by Haemophilus strains in a susceptible host, preferably a human. An Hia protein is useful as an antigen, in immunogenic preparations including vaccines, as a carrier of or other immunogens, and in the generation of diagnostic reagents. Hia is useful for treating diseases caused by the infection of Haemophilus influenzae such as menigitis, epiglottitis, septicaemia and otitis media. Recombinant production of Hia favours high recovery of the low recovery of native protein from Haemophilus influenzae species. A truncated protein has a significantly higher amount of recovery than a full-length protein.

The present sequence represents a Haemophilus influenzae adhesin (Hia)

protein from the non-typeable Haemophilus influenzae (NTH1) strain K22.

protein from the non-typeable Haemophilus influenzae (NTH1) strain K22.

Hia genes and proteins have antiinflammatory, auditory and antibacterial
activities, and can be used in the production of a vaccine. An
activities, and can be used in the production of a vaccine. An
immunogenic composition comprising an Hia gene, a polypeptide encoded
by an Hia gene, or a recombinant Hia polypeptide is useful for inducing
protection against disease caused by Haemophilus strains in a
protection against disease caused by Haemophilus strains in a
autigen, in immunogenic preparations including vaccines, as a carrier
antigen, in immunogenic preparations including vaccines, as a carrier
for other immunogenic acused by the infection of Haemophilus
is useful for treating diseases caused by the infection of Haemophilus
media. Recombinant production of Hia favours high recovery of the
influenzae species. A truncated protein has a significantly higher
amount of recovery than a full-length protein. for Novel nucleic acid encoding Hemophilus influenzae adhesin protein, iuse as antigens and vaccines and for treating Hemophilus influenzae infection Claim 1; Fig 23; 275pp; English. ```
The present sequence represents a Haemophilus influenzae adhesin (Hia) protein from the non-typeable Haemophilus influenzae (NTHi) strain M407. His genes and proteins have antiinflammatory, auditory and antibacterial activities, and can be used in the production of a vaccine. An immunogenic composition comprising an Hia gene, a polypeptide encoded by an Hia gene, or a recombinant Hia polypeptide is useful for inducing protection against disease caused by Haemophilus strains in a susceptible host, preferably a human. An Hia protein is useful as an antigen, in immunogenic preparations including vaccines, as a carrier for other immunogenic preparations including vaccines, as a carrier for other immunogenic preparations including vaccines, as a carrier is useful for treating diseases caused by the infection of Haemophilus influenzae such as meningitis, epiglottitis, septicaemia and otitis media. Recombinant production of Hia favours high recovery of the low recovery of native protein from Haemophilus influenzae species. A tunncated protein has a significantly higher amount of recovery than a full-length protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1217

DE	Haemophilus influenzae adhesin (Hia) protein from NTHi strain 33.	
XX	Hia; adhesin; Haemophilus influenzae adhesin; NTHi; infection; vaccine;	

```
The present sequence represents a Haemophilus influenzae adhesin (Hia)

protein from the non-typeable Haemophilus influenzae (NTH1) strain 33.

the protein from the non-typeable Haemophilus influenzae (NTH1) strain 33.

Hia genes and proteins have antiinflammatory, auditory and antibacterial activities, and can be used in the production of a vaccine. An activities, and can be used in the production of a vaccine. An immunogenic composition comprising an Hia gene, a polypeptide encoded immunogenic composition compressed by Haemophilus strains in a protection against disease caused by Haemophilus strains in a protection against disease caused by Haemophilus strains in a carrier antigen, in immunogenic preparations including vaccines, as a carrier antigen, in immunogenic preparations including vaccines, as a carrier for to other immunogenic acused by the infection of Haemophilus influenzae such as meningitis, epiglottitis, septicaemia and ottis media. Recombinant production of Hia favours high recovery of the low recovery of native protein from Haemophilus influenzae species. A truncated protein has a significantly higher amount of recovery than a full-length protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      1227

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ---SIGNSNNN-----342
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The present sequence represents an antigenic protein derived from Haemophilus paragallinarum strain C-53-47. The antigenic protein stimulates the production of HI antibodies in fowl. The protein and DNA coding for it can be used in the preparation of vaccines for the prevention of chicken infectious coryza (CIC). The protein and its antibodies can be used in the diagnosis and treatment of CIC.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Antigenic polypeptide from Haemophilus paragallinarum induces HI antibody production - and is useful for diagnosis of and preparation of vaccines for chicken infectious coryza
